DETAILED ACTION***Information Disclosure Statement***

1. The information disclosure statement filed 4/2/2003, 4/4/2003 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because it contains numerous duplicate entries which the examiner can not take time to delete. Please provide a single copy of the cited references without duplicated entries. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 60-62 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 5,571,384. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims contain broader recitations of the patentable subject matter of the patented claims, namely a retarder stack with two or more retarders such that a first additive color of a first polarization and its complementary color of an orthogonal polarization are passed.

3. Claims 84-87 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,751,384.

It is old and well known in the art to utilize beam splitters to separate light having two polarizations into its component polarized beams in order to separately modulate each and then recombine them for projection.

Allowable Subject Matter

4. Claims 63-83 are allowed.
